Big Bottles. Big Disadvantages.

Lifting – Bulky 5 gallon water bottles weigh nearly 45 lbs and the constant lifting of these bottles by your employees is a workers comp claim waiting to happen.

Storage – All of these water bottles clutter your office and take up valuable space.

Sustainability – Americans throw away 22,000,000,000 plastic bottles in the landfill annually, and every 8 oz of “clean” bottled water requires more than 2 oz of oil to produce!
